Key Business Findings

Executive summary and strategic recommendations based on dashboard insights.

Executive Summary

This dashboard analyzes marketing performance, customer behavior, and sales performance using a dataset of approximately 5,000 customers.

The objective was to identify key business trends, evaluate marketing efficiency, understand customer retention, and uncover opportunities to improve revenue growth, customer lifetime value, and overall business performance.

Sales Insights

- Revenue generation varied considerably across sales representatives.
- Higher customer acquisition volumes did not always correspond to the highest revenue, indicating differences in customer quality and deal value.
- Revenue performance differed across countries and subscription plans, highlighting opportunities to improve sales strategy and resource allocation.

Revenue Highlights

- Total revenue reached approximately **\$494M**.
- Email marketing generated the highest revenue among all marketing channels.
- Starter and Enterprise subscription plans contributed the largest share of total revenue.
- Nigeria recorded the highest customer volume and overall revenue contribution.

Marketing Insights

- Paid Search achieved one of the strongest ROAS values across all marketing channels.
- Organic Social also delivered strong revenue performance.
- Customer acquisition costs varied noticeably between channels, suggesting opportunities to optimize marketing spend.
- Marketing performance differed significantly across acquisition channels.

Strategic Recommendations

- Increase investment in the highest-performing marketing channels to maximize return on investment.
- Analyze the strategies used by top-performing sales representatives and replicate best practices across the sales team.
- Prioritize customer retention initiatives in regions with higher churn rates.
- Focus on expanding high-value subscription plans to increase customer lifetime value.
- Continue monitoring customer satisfaction to support long-term business growth..

Customer Insights

- Average customer lifetime value remained above \$2,000.
- Customer satisfaction (NPS) remained consistently high across the customer base.
- Churn rates varied between countries, creating opportunities for targeted retention initiatives.
- Device usage and subscription preferences differed across customer segments, suggesting the need for more personalized customer experiences.
